Website Master Price List + Fragrance Notes

297 source records - 3ml / 6ml / 15ml / 30ml / 50ml / 100ml

Pricing formula: Website Price = (Size x Cost/ml) + Bottle Cost + Allocated Ad Cost + Target Profit. **Important note policy:** Published fragrance profiles are used where the perfume identity is sufficiently clear. For supplier-specific/generic names where the exact formula cannot be uniquely established from the name alone, the document explicitly marks the entry instead of inventing a note pyramid. This distinction is intentional so the website does not receive fabricated fragrance information.
